

BRAKE FLUID DOT-4

BRAKE FLUID DOT 4 is a high-quality synthetic fluid used for automotive brake and clutch systems, with high viscosity index to give superior performance over a wide temperature range.

BENEFITS

- It is miscible with all other synthetic fluids of similar quality. BRAKE FLUID DOT 4 has good vapor lock characteristics. It is compatible with rubber seals and hoses and provides corrosion protection for metals.

PERFORMANCE LEVEL

- Meets the specification of SAE J1703 and FMVSS 116 DOT 4

ADDITIONAL QUALITY FEATURES

- Synthetic Fluid
- Good wear and corrosion protection
- Resistant to moisture absorption
- High dry and wet boiling points.
- Viscosity suitable at cold as well as high temperatures

TYPICAL TECHNICAL PROPERTIES

Physical Characteristics	Test Method	Typical Value
Grade		DOT 4
Density @ 20 °C	D-1298	1.04
Kinematic Viscosity @ 100°(cSt)	D-455	1.5
Kinematic Viscosity @40°(cSt)	D-455	1500
Dry Boiling ERBP	D-1120	260
Wet Boiling Point	SAE J1704	160

Note: All figures may vary slightly.
